

Twin2Go – Milestones

Twin2Go Milestones

What have we achieved in the 1st project period?

The project activities in the 1st reporting period fit well to the time schedule envisaged in the 'Description of Work'.

Twin2Go reviewed different methodological approaches for comparative analyses in water management projects, developed its own methodological framework addressing water governance in the context of climate change, and collected case study data from the several research projects.

Twin2Go Milestones

What have we achieved in the 2nd project period?

Accompanying dissemination and networking activities continued in the 2nd reporting phase. Data collection was finished, the synthesis methodology was prepared and applied, best-practices were identified, and policy-relevant recommendations were formulated. The involvement of the Advisory Board as well as external experts and stakeholders played an important role, both for conclusions from the comparative analyses as well as for the dissemination of insights to the policy community.

In the 2nd period, Twin2Go hosted a Synthesis Workshop (WP 2), as an important step in the analysis of the collected case study data.

Furthermore, Twin2Go carried out a series of Regional Best Practice Workshops (WP 3) and a series of Policy Workshops (WP 4) as side events at relevant meetings in the water sector.

Twin2Go Milestones in Review

- Kick-off meeting
- Twin2Go internet website launched
- Methodology workshop
- 1st meeting with Stakeholder Board
- 1st Interim meeting
- 2nd Interim meeting
- Synthesis workshop
- Launch of internet database on adaptive water governance, in the Twin2Go case study river basins
- 4 regional workshops on best practices completed
- Launch of communication kit
- Publishing of best practice guidelines
- 4 policy review workshops completed
- Final meeting
